TEJ Linux Offline Kit

Printable Quick Start

Technology Commons | Port Credit Secondary School

1. Get the files

- Download the TEJ Linux Offline Kit or copy it from the class USB drive.
- Extract the ZIP. Keep the complete folder together, including hidden files.
- Open START-HERE.html inside the extracted folder.

Linux Offline Kit

2. Open the correct terminal

Computer	How to open the terminal at home
Windows	Open Start and search for WSL or Ubuntu. If it is missing, ask the computer owner before using wsl --install as an administrator. Setup needs Internet and may require a restart.
Mac	Press Command + Space, type Terminal, then press Return. No installation is needed.
Chromebook	On a personal or owner account: Settings > About ChromeOS > Developers > Linux development environment > Set up. Setup needs Internet once. A school-managed Chromebook may block this feature.
Linux Mint or Ubuntu	Press Ctrl + Alt + T, or open Terminal from the application menu.

3. Choose the work and file format

Terminal Quest inspects the computer and records commands. Bashcrawl teaches navigation through a terminal game. Use ODT in LibreOffice, DOCX in Word or LibreOffice, or TXT if no office program is installed. PDF is for reading or printing.

4. Start Bashcrawl

Copy the complete bashcrawl folder into Home > Games. On a Chromebook, move it into Linux files first. Then run one command at a time:

```
cd ~/Games/bashcrawl/entrance
```

```
cat scroll
```

5. Save now and submit later

- Save the completed ODT, DOCX, or TXT file locally with your name in the filename.
- Insert readable screenshots, or save them beside the TXT answer sheet.
- Upload the completed work to Google Classroom when Internet access returns. Never record passwords, tokens, Wi-Fi credentials, or student numbers.
