

PERSONAL LOGO: IDEA TO SVG

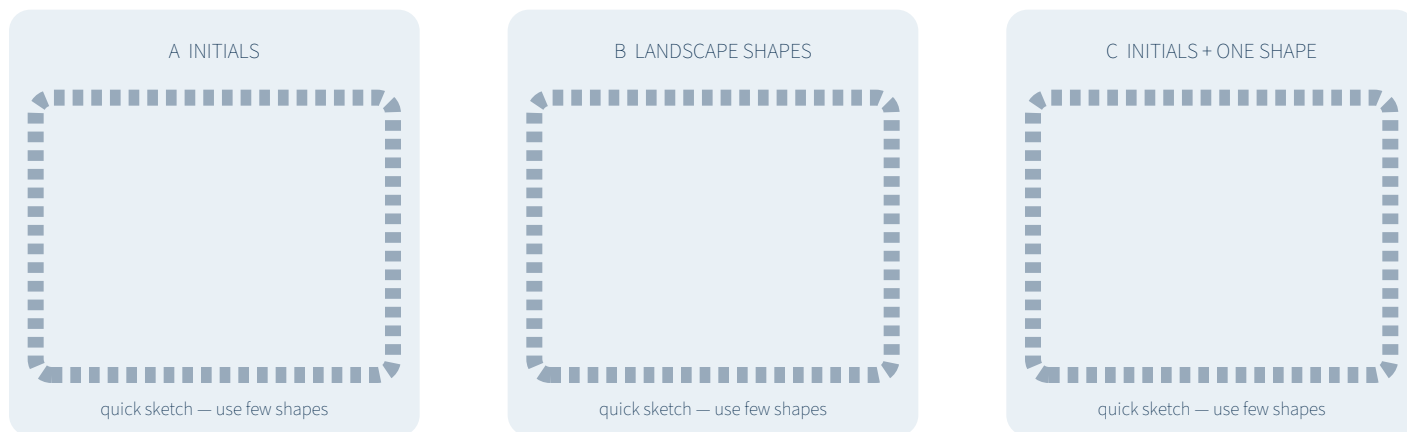

Turn a hand-drawn or AI-made inspiration image into your own simple Photopea logo.

1 START WITH INSPIRATION, THEN SIMPLIFY

Do not trace every detail. Pick two or three useful shapes and rebuild them in your own way.

2 SKETCH THREE DIFFERENT SIMPLE MARKS

3 BUILD IN PHOTOPEA

1000 × 1000 px · transparent background · place reference · lower opacity · lock layer

Rebuild with Shape, Pen and Type tools. Hide the reference. Test the new silhouette in black.

4 ADD SIMPLE COLOUR

Use one main colour, one supporting colour and an optional accent. Keep a black version for engraving.

5 TEST + SAVE

☐ clear at 25 mm wide

☐ works white on dark

☐ no tiny gaps or thin lines

☐ works in solid black

☐ colour has strong contrast

☐ saved as PSD, SVG and PNG

FLOW: inspiration → choose shapes → sketch → rebuild → colour → test → export

Your final mark should be simpler and more original than the starting image.
