TEJ Linux Offline Kit

Printable Quick Start

Technology Commons | Port Credit Secondary School

1. Get the kit

- No Internet: copy TEJ-Linux-Offline-Kit.zip from the class USB drive to Downloads.
- Internet available: scan the code or open the address below and download the same ZIP.
- Double-click the ZIP, choose Extract, and keep the complete extracted folder together.

Linux Offline Kit

2. Open the local instructions

- Open the extracted TEJ-Linux-Offline-Kit folder.
- Double-click START-HERE.html. It opens locally in a browser and does not need Internet.
- Choose 3.1 Computer Detective or 3.2 Bashcrawl. Open the ODT in LibreOffice, or use the PDF and matching TXT answer sheet.

This sheet focuses on Linux Mint and the class USB. Use the website for Windows, Mac, Chromebook, or phone instructions. A phone is slower and more difficult than a computer.

3. Prepare Bashcrawl

In the extracted kit, copy the complete bashcrawl folder. In Files, open Home, create a folder named Games, and paste bashcrawl inside it. Hidden rooms are part of the game, so copy the whole folder.

- Open Terminal with Ctrl + Alt + T in Linux Mint, including the live USB session.

```
cd ~/Games/bashcrawl/entrance
```

```
cat scroll
```

4. Play and record your work

Run one command at a time. Do not type the $ prompt symbol.

```
ls        pwd        cat scroll
```

```
cd roomname        cd ..        ls -a
```

- Read each clue, explore, and complete the answer sheet. A wrong turn is part of the problem solving.
- Save the completed ODT, DOCX, or TXT file with your name in the filename.
- Save readable screenshots in the document or beside the TXT answer sheet.
- Copy your work back to the USB if needed. Upload it to Google Classroom when Internet returns. Never record passwords, tokens, or Wi-Fi credentials.
