

PHOTOPEA GUIDE

1. Create a square file

Technology Commons | Port Credit Secondary School

Student Number: _____ Date: _____

1 Create a square file

Choose File > New. A square master is easy to reuse and does not represent the physical name-tag size.

- ☐ Width: 1000 px
- ☐ Height: 1000 px
- ☐ Background: Transparent

Do this

Choose File > New. Name the file PERSONAL LOGO. Set Width to 1000 px, Height to 1000 px, and Background to Transparent. Select Create.

STOP AND CHECK

Checkpoint: a square checkerboard canvas is visible.

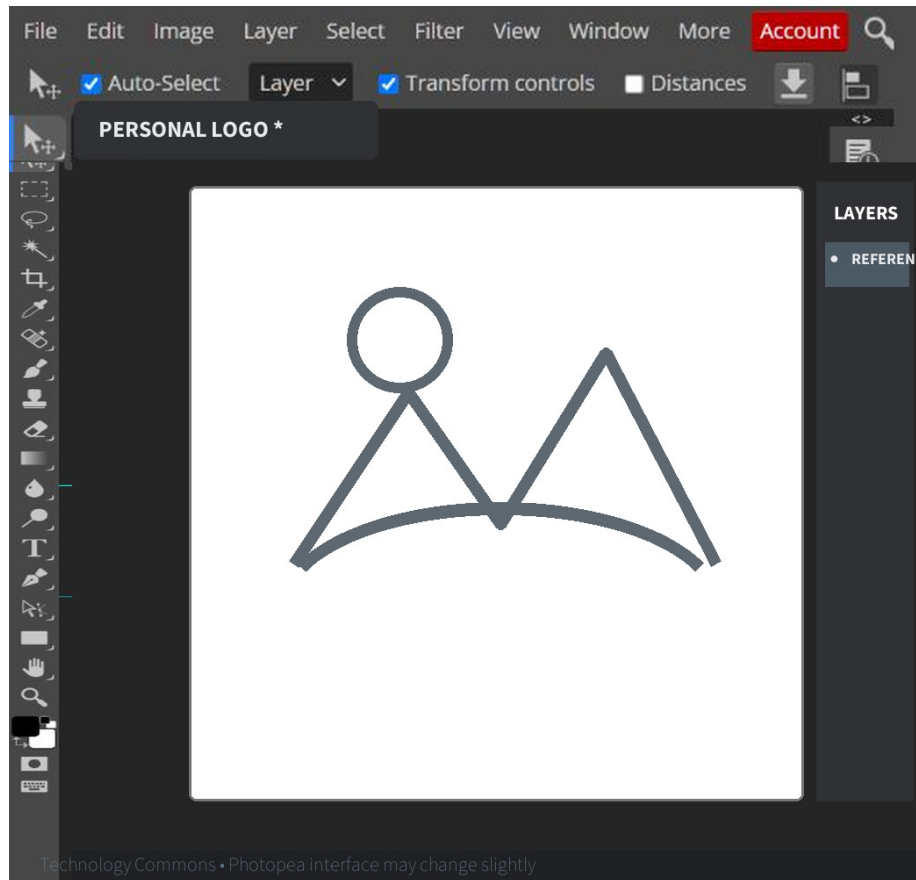

PHOTOPEA GUIDE

2. Place the selected sketch

Technology Commons | Port Credit Secondary School

Student Number: _____ Date: _____

2 Place the sketch

Choose File > Open & Place.
Select the photo or scan of the sketch you chose on the handout.

- ☐ Rename the layer REFERENCE
- ☐ Resize it to fill most of the square
- ☐ Keep the proportions locked

Technology Commons • Photopea interface may change slightly

Do this

Choose File > Open & Place. Select a clear photo or scan of the sketch chosen on the worksheet. Resize it to fill most of the square without stretching it.

STOP AND CHECK

Checkpoint: the sketch appears on its own layer.

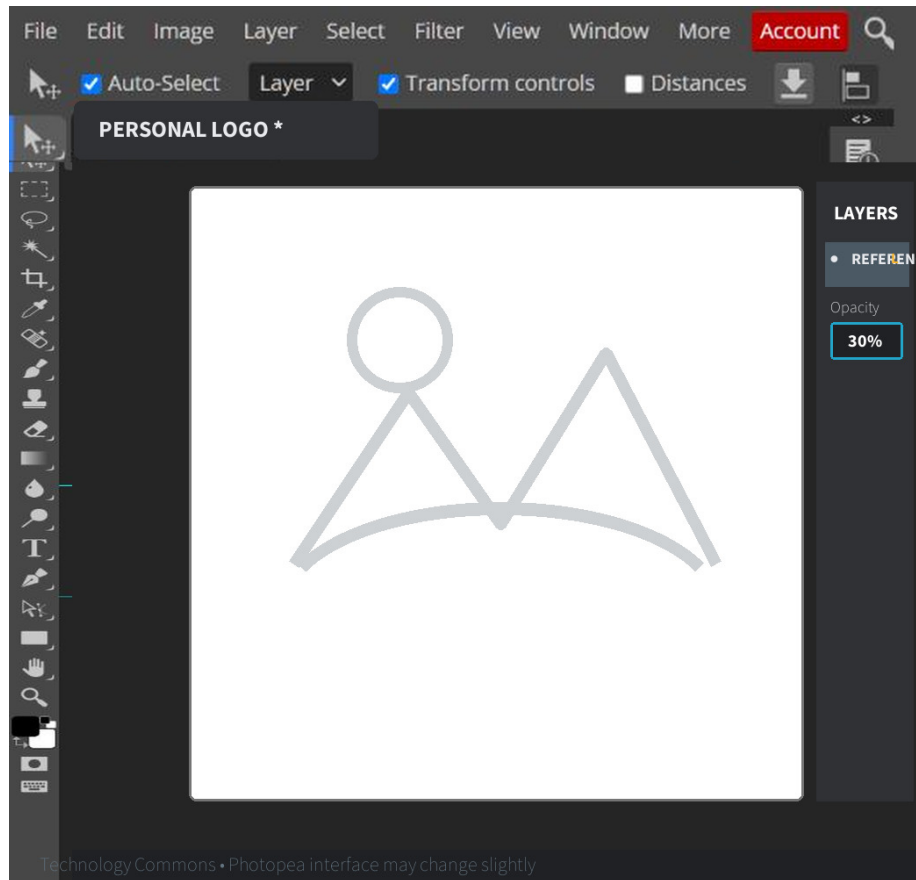

PHOTOPEA GUIDE

3. Make a safe reference layer

Technology Commons | Port Credit Secondary School

Student Number: _____ Date: _____

3 Fade and lock it

The sketch is only a guide. Lower its opacity so the clean shapes are easy to see, then lock it so it cannot move.

- ☐ Opacity: 30%
- ☐ Select the lock icon
- ☐ Do not draw on REFERENCE

Technology Commons • Photopea interface may change slightly

Do this

In Layers, double-click the sketch layer name and type REFERENCE. Set Opacity to 30%, then select the lock icon. Never draw on this layer.

STOP AND CHECK

Checkpoint: the sketch is faint and locked.

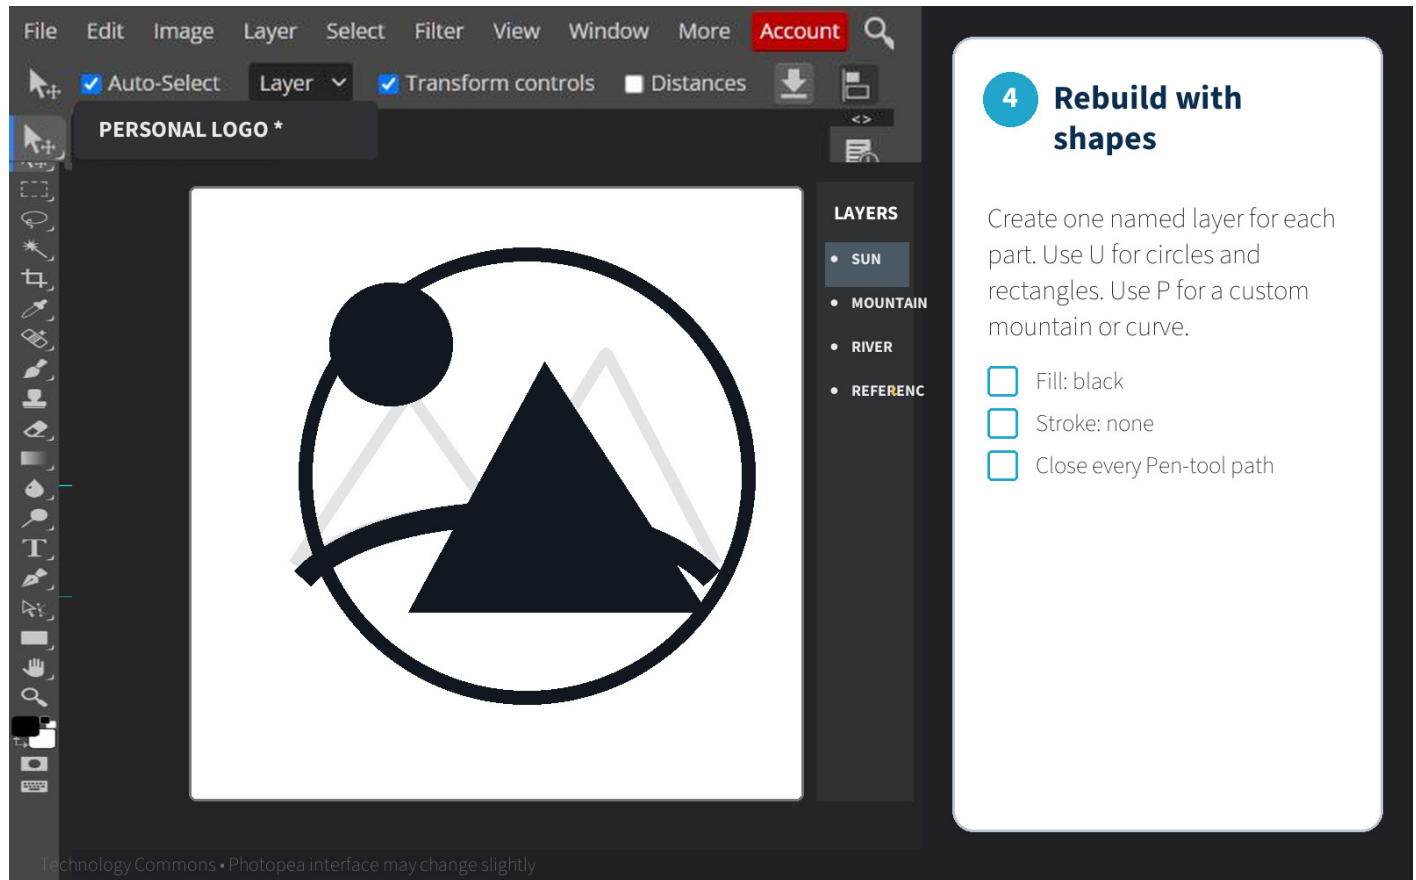

PHOTOPEA GUIDE

4. Rebuild with clean shapes

Technology Commons | Port Credit Secondary School

Student Number: _____ Date: _____

Do this

Select New Layer and name each part. Press U for circles and rectangles. Press P for a custom shape. Set Fill to black and Stroke to none. Close every Pen-tool path.

STOP AND CHECK

Checkpoint: SUN, MOUNTAIN, and RIVER are separate named layers.

PHOTOPEA GUIDE

5. Run the black and size tests

Technology Commons | Port Credit Secondary School

Student Number: _____ Date: _____

5 Run the black test

Hide REFERENCE. Shrink the mark on screen. If it becomes confusing, remove details or open narrow gaps.

- ☐ Readable at about 25 mm
- ☐ No tiny floating parts
- ☐ Strong black silhouette

Technology Commons • Photopea interface may change slightly

Do this

Hide REFERENCE by selecting its eye icon. Zoom out until the mark is about 25 mm wide on screen. Remove details that disappear, close up, or become confusing.

STOP AND CHECK

Checkpoint: the logo still reads as one strong black mark.

PHOTOPEA GUIDE

6. Add colour and export

Technology Commons | Port Credit Secondary School

Student Number: _____ Date: _____

6 Colour and export

Add only two or three colours after the black version works. Keep the editable source and export the formats needed later.

- ☐ Save the PSD first
- ☐ Export SVG for scaling
- ☐ Export transparent PNG for the name tag

File > Export As

- SVG vector master
- PNG transparent copy
- PSD editable source

Technology Commons • Photopea interface may change slightly

Do this

Use two or three colours only after the black version works. Save the editable PSD. Choose File > Export As > SVG for the scale-free master and PNG for the transparent name-tag copy.

STOP AND CHECK

Checkpoint: PSD, SVG, and transparent PNG are saved.
